## Rechargeable batteries and alkaline battery packs

When you are using a regulator that does not include a battery, select a battery with the best size for your station's needs. You can also purchase replacement batteries for older batteries that were included with your regulator. Alkaline battery packs are also available for use in short-term applications or in applications where it is feasible to periodically replace the batteries.

		Battery Type	UL Approval File Number	Output Voltage	Nominal Rating
<p><b>BP7</b> 7 Ah 12 V Sealed Rechargeable Battery</p> <p>Popular</p> 		Sealed lead acid (SLA)	MH16464	12 Vdc	7 Ah
